

# GRADY-WHITE BOATS

# GRADY-WHITE BOATS

Hello,

I'm Eddie Smith, Jr. As President of Grady-White Boats, I'd like to tell you why owning a Grady-White is a superior investment as well as a very rewarding and enjoyable experience.

In the 50's and 60's our wooden, lapstrake-hulled boats earned the respect of coastal fishermen from Maine to North Carolina by performing superbly in the roughest seas. The wide beams and flared bows proved extremely safe and dependable.

Grady-White began producing easy-to-care-for fiberglass Grady Whites about 16 years ago. To maintain our already famous reputation for safety and dependability, we produced our fiberglass Grady-Whites by the hand lay-up method. No other method of boat building insures the same degree of uniformity, strength from stem to stern, hull performance and lasting beauty.

Grady-White continues to build boats by this time-consuming method. Our craftsmen are skilled and our production is limited and unhurried so that we can continue to set the standard for quality in the boat building industry. Since most Grady-Whites are being used for fishing either offshore or in large bodies of water, I feel a personal responsibility to insure that our boats are as strong and safe as possible.

Our company is family-owned and family-managed. My greatest source of personal satisfaction comes from knowing that we build for your family one of the finest, best performing and safest boats at a fair price. My entire working life has been dedicated to personalized attention to production, sales and service of Grady-White boats.

Our Grady White dealer organization is, in my opinion, the strongest and most professional dealer group in the entire world. Our dealers and their families personally. Since Grady-Whites should be built and serviced as well as they should be sold, giving your dealer the factory support I strongly believe that every Grady-White, please visit us in Greenville in our new, modern, air-conditioned, dust-free factory. Once you've met the people who build Grady-White boats and have seen how they are made, you'll know why Grady-White is the choice of knowledgeable, skillful boaters.

Thanks for considering Grady-White in this, our 26th year. No matter whether you use your boat for family recreation, serious sportfishing or both, sooner or later as a serious boater, I'll bet you'll own a Grady-White.

Happy boating!

Sincerely,

*Eddie Smith, Jr.*

Eddie Smith, Jr., president

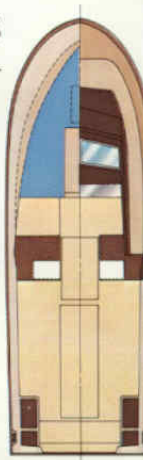

## HOW TO USE THIS CATALOG:

We've tried to make choosing the right Grady-White as easy as possible. So, this brochure is arranged by boat model design series in descending boat lengths within each series. The power options and features are listed with each model. Here's how to tell which Grady-White is right for you:

### MODEL SERIES

We build "Pro" models, walkaround cabin models, center consoles and dual console "Tournament" models. The designs are grouped in that order with the larger boats first. You'll find overhead drawings on all models (except the center consoles) which tell you more about the cockpit and cabin layouts.

### POWER OPTIONS

The Grady-White center consoles are available only in outboard powered versions. All other Grady-Whites are available with either outboard, inboard/outboard or Sea Drive power. The aft cockpit design for each model changes with the specified power option, so we've included aft cockpit pictures with each model series. Specifications directly related to each boat, such as hull draft, weight, etc., are included directly under each aft cockpit picture.

### STANDARD FEATURES & FACTORY OPTIONS

Standard features and factory options for each boat are included on each model's page. Since features and options vary according to power, each boat model has its own column specifying exactly what's standard and optional for the boat. Additional pictures of factory options can be found on page 23.

# 4 STATE-OF-THE-ART SPORTFISHING DESIGNS

There are four basic design concepts among the 26 Grady-Whites from 19 to 25 feet. Blue water day boat "Pro" models are available in 24 and 25 feet. Walkaround cabin models are available in 20, 22, 24 and 25 foot lengths. We build two center consoles in 20 and 24 foot lengths and dual console Tournament models are available in 22 and 19 foot lengths.

**Pro models are walkaround cabin boats designed for maximum cockpit room and lockable cabin storage.**

Pro models offer the protection of a full windshield, top and side curtains, ready bow access for 360° fishing, huge aft cockpits packed with fishing features and one-bunk cabins which offer plenty of lockable storage. The cabins have room for a marine head and the single bunk can be converted to a double with optional cushions. The cabin emphasis is on lockable storage with rod racks, tackle drawers, storage compartments and shelves.

The self-bailing cockpits are clean and uncluttered as a result of the built-in storage, tackle drawers and overboard draining fish boxes. Popular with blue water day fishermen and charter captains, the Pro model helm areas are specifically designed to accommodate advanced electronics.

**Walkaround cabin models offer 360° fishing and the protection of a cabin that has berths for overnighting.**

The first Grady-White walkaround cabin designs were introduced over a decade ago. Today, our current models cover 10 years of refinements and improvements in our 20, 22, 24 and 25 foot walkaround cabin designs.

The walkaround cabin concept combines a rugged, no-nonsense hull design with 360° fishability around the windshield and cabin. Inside the lockable cabins, there's room for a head, lots of storage, berths, rod storage and a rope locker. The self-bailing cockpits feature overboard draining fishboxes, more rod storage and lots of fishing features.

**The revolutionary Grady-White center consoles.**

For the ultimate in wide-open, no-nonsense sport-fishing, the Grady-White 24 and 20-foot Fisherman center consoles offer true blue water capability and outstanding hull designs. These center consoles are unique in the industry because of their huge dry storage areas, lockable electronics compartments, and in the 24, unequaled lockable rod and tackle storage.

**Open, dual console Tournament models offer the protection of a full windshield and canvas.**

If you need a completely open boat that offers the protection of a full windshield, top and side curtains, the dual console Tournament models in 19 and 22 foot lengths are designed for you. With dual consoles instead of a single center console, Tournament models retain easy forward access without sacrificing weather protection.

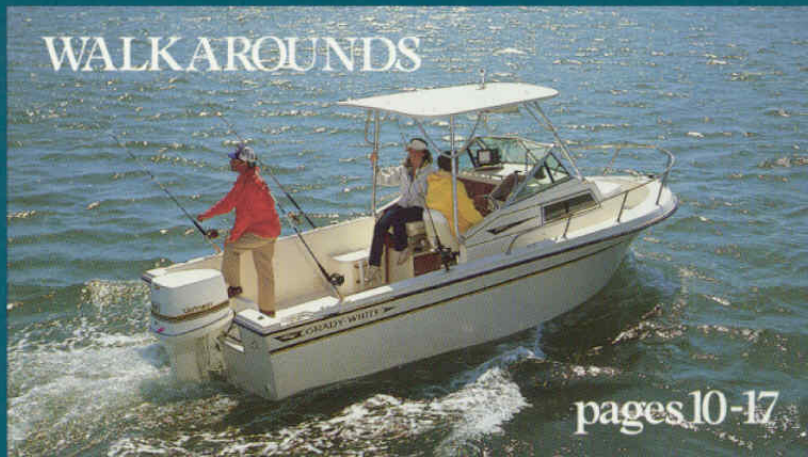

Dual console Tournament models also offer storage in two consoles, a much larger aft cockpit space for fishing and, of course, a rugged seaworthy Grady-White hull design with fully-lined, non-skid, self-bailing cockpits.

Grady-White's 185,000 square foot plant in Greenville, North Carolina

1 Mold preparation

2 Gel coat spray booth

3 Fiberglass hand lay up

7 Through bolted deck hardware

8 Engine electrical systems test

9 Hand fitted teak trim

## The time-honored craftsmanship of North Carolina boat-building combined with state-of-the-art fiberglass technology.

One visit to the 185,000 square foot Grady-White plant in Greenville, North Carolina will give you insight into how technology like central resin systems, air management control and production efficiency all work in concert with unhurried attention to detail and hand craftsmanship to produce Grady-White boats. At Grady-White, we utilize advanced technology in order to maintain top quality at a competitive price.

1 Each Grady-White hull, deck and liner is produced from a mold which is painstakingly prepared, inspected, then polished to a high gloss that insures Grady-White's

smooth, lasting finish.

2 The molds then enter dust-free spray booths where NPG gel coat, a thin layer of ultra-high quality resin, is evenly sprayed over the surface. The gel coat provides the outer, protective surface, the color and the smooth finish traditional with Grady-White boats.

3 When the gel coat is dry, pre-cut patterns of fiberglass mat and woven roving are placed in the hull and sprayed with precise amounts of resin. The fiberglass is then rolled smooth by hand, producing an exact ratio of fiberglass to resin. Grady-White is one of the few boat builders that continues to use the expensive, time-consuming hand lay up method, but no other method of fiberglass boat-building offers such uniformity of thickness for strength and lasting durability.

4 All Grady-Whites have high-strength wooden stringers which are completely encapsulated in resin and fiberglass and glassed into the hull while it remains in its mold. This combination of both wood and fiberglass provides a superior structural grid system for maximum strength.

5 After the stringer systems are installed, the hull "cures" in its mold for many hours. This curing means that your Grady-White hull will always retain its original shape.

6 After the hulls and decks are pulled from their molds, polyurethane foam is sprayed into strategic cavities providing floatation, strength, sound insulation and thermal insulation. The insulated boxes, fitted with through-hull overboard drains, receive large amounts of foam for insulation superior to that of portable coolers.

**4** Glassing stringer system

**5** Hull curing process

**6** Sprayed foam flotation

**10** Canvas installation

**11** Quality control checklists

**12** Grady-White truck delivery

**7** Decks are turned upside down and all standard deck hardware is securely through-bolted with aircraft-type locking nuts. Hardware subject to added stress, such as the marinium cleats, receive added backing for rugged durability.

**8** Stern drive engines are installed and test-run in the plant. During the test, the electrical systems, gauges and steering systems are also tested before the boat moves toward the finishing touches.

**9** As the boat takes shape, it receives the individual attention of a custom-made boat. Hardwood trim is made in our wood-working shop then custom fitted to each boat.

**10** Windshield systems and canvas options are custom-installed to each boat. Canvas is installed then repacked for

shipping to insure a perfect fit.

**11** Quality control gets top priority all down the assembly line and our quality control inspectors have top authority. Our plant is equipped with lighting systems that produce twice the required illumination in order to detect even the slightest flaws.... before assembly, during assembly and during the tough, final inspection which can cover as many as 150 different check points.

**12** When your boat is ready to be shipped, it is carefully loaded on a Grady-White truck and transported to your dealer by a Grady-White driver who is specifically trained in delivery of fiberglass boats.

### Compare these Grady-White features:

- ☐ Original Grady-White hull & deck designs
- ☐ 100% hand laid hulls & decks
- ☐ Solid foam flotation & insulation
- ☐ Self-bailing cockpits
- ☐ Overboard draining insulated boxes with through-hull fittings.
- ☐ Through-bolted standard deck hardware
- ☐ State-of-the-art VDO gauges
- ☐ Custom-fitted hardwood trim
- ☐ Heavy-duty marinium deck hardware & stainless steel bow rails
- ☐ Precise, integrated sportfishing design resulting from over 25 years of boat-building experience

# NEW 20' & 24' CENTER CONSOLE FISHERMAN

## 24'-249 FISHERMAN

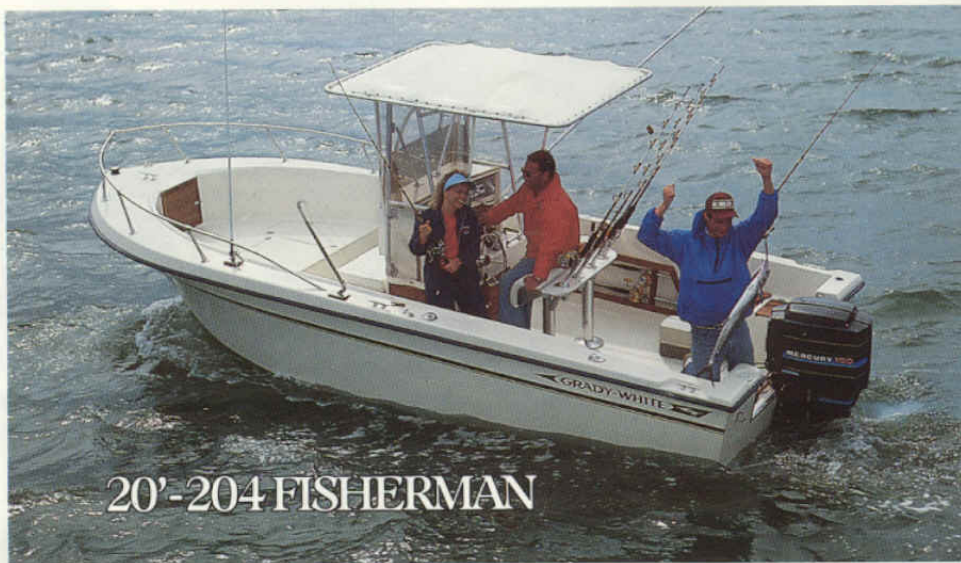

This is the next generation in open, offshore design. Combine rugged, dry riding blue water capabilities with lockable storage for *all* your electronics, 8 offshore rods, and all your fishing tackle and gear. Then add 215 quarts of fish box capacity in a 5-foot forward box, a fresh water sink, a wash-down system, recirculating live well and a head compartment.

The new 249 Fisherman packs more offshore fishing features into a solid 100% hand-laid Grady-White 24-foot hull and deck than you would have thought possible. Plus, there are customizing options available like a t-top, lean bar with 86 quart cooler and rod holders, and outriggers. Simply put, it's state-of-the-art.

249 bow storage

Our smaller, 20-foot center console Fisherman is a definite winner in this size range when it comes to rugged, blue water sport-fishing. The solid, hand-laid hull and deck is dry-riding and the fully lined, non-skid cockpit is self-bailing like all Grady-Whites. The 204 Fisherman shares the same console design with the 24' Fisherman so there's plenty of lockable storage for your VHF, CB, Loran unit and chart recorder. There are even lockable tackle drawers on the port side of the console. When you add optional features like t-tops, canvas, wash-down systems and aerated live wells, it's easy to see why the 204 is one of our favorite state-of-the-art sportfishing boats.

## 20'-204 FISHERMAN

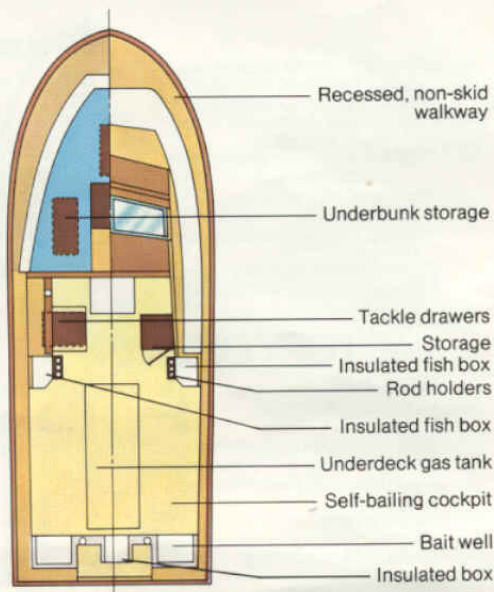

# OVERNIGHTER 20s

**T**he walkaround cabin fishing boat was a novel idea when we built our first Overnighter 20s over ten years ago. With a cabin for overnighting, the protection of a full windshield and canvas and 360° fishing all around the boat, this design concept is now popular with fishing families from coast to coast. These easily trailerable 20-footers for 1985 are the result of over a decade of improvements and refinements. With 325 quarts of overboard draining fishbox capacity, storage for 10 or more rods and tackle drawers and lockable storage for your gear, the big self-bailing cockpits stay clear and uncluttered. With the protection of a full windshield and canvas, you can fish offshore or cruise and ski with the family.

## STANDARD FEATURES

### CABIN

# SEAFARER 22s

**T**he Seafarer 22s have become one of our most popular models since their introduction three years ago. No wonder. Their 8-foot beam, 22-foot modified vee hulls provide a solid, stable and dry ride. And the walkaround cabin design gives full forward access without sacrificing the protection of a windshield, top and side curtains.

The self-bailing Seafarer cockpits are outfitted with four scuppers and the big, insulated fish boxes all drain overboard...not into the bilge. With two berths in the cabin and room for an optional marine head, these trailerable 22s are perfect family boats that double as hardnosed offshore sportfishing machines.

## STANDARD FEATURES

### CABIN

	226	227	228

# TOURNAMENT 22s

**A** professional tournament fisherman told us he bought a dual console immediately after finding out about our Tournament models. He said he had wanted this exact design for years. The dual console design concept gives you bow access for fighting fish or casting nets and the aft cockpits are much larger than those of center consoles. But, the real advantage offshore is the extra protection provided by the full windshield, and optional top and side curtains. Two consoles offer more storage too. So, the big self-bailing cockpits stay uncluttered when you're running offshore for the big ones.

## STANDARD FEATURES

### COCKPIT & DECK

# OFFSHORE 24s

**A** trailerable 24-footer has lots of advantages. Especially if it is a Grady-White Offshore 24 walk-around cabin. This Jim Wynne-designed, 100% hand-laid fiberglass hull is ready for real blue water fishing. In the self-bailing cockpit with both aft and forward scuppers, there are two large insulated fish boxes that drain overboard. And in the cabin, you can stretch out on two full sized bunks and lock up plenty of rods and gear.

The Offshore 24s offer you blue water action and the protection of a full windshield and cabin in a trailerable sportfisherman that lets you fish more places. That's a great combination for family fishing fun.

## STANDARD FEATURES

### CABIN

	240	241	242

# OFFSHORE PRO 24s

**N**ew for 1985, the Offshore Pro 24s offer blue water day fishing capabilities in an 8-foot beam, trailerable fisherman. If you've found that cabins are most often used

as storage spaces for fishing gear and an occasional nap, these Offshore Pros are designed for you. There's a single berth, room for a head, and the rest is specifically designed for secure, lockable storage.

The self-bailing cockpits provide four scuppers, two big overboard draining fish boxes, a live well and even a fresh water faucet built into the portside gunwale. While there are pros and cons to every trailerable sportfisherman, this one's built for pros.

## STANDARD FEATURES

# SAILFISH 25s

**T**

his is the boat that started the movement toward wide beam, blue water sportfishermen in the 25-foot range. The Sailfish 25s offer 9½ feet of beam

in their 100% hand laid, modified vee hulls. With big four scupper, self-bailing cockpits and overboard draining fish boxes, you can fish offshore with the much larger sportfishermen.

In the cabins, the Sailfish 25s give you weekending capability with three berths, enclosed head area, galley, table and plenty of storage. But make no mistake, the Sailfish 25s are true, hardnosed fishing machines. We think they're the perfect marriage of blue water sportfishing and over-nighting cabins.

## STANDARD FEATURES

# TROPHY PRO 25s

**C**harter captains and big water day fishermen asked us for a blue water day boat for years. The Trophy Pro 25s are our answer. The cabins on these boats are designed specifically for day trips offshore with storage for 12 rods, shelves for tackle boxes, tackle drawers, a hanging locker and side shelves. A single berth (convertible to double with the optional cushions) and a head compartment are also included.

The huge, self-bailing cockpits are fitted for offshore with tackle drawers, a bait rigging area, recirculating live well and 380 quarts of insulated fish box capacity. Plus, the recessed walkway around the cabin provides safe forward access.

## STANDARD FEATURES
